## Description

- Unlike clay, which is simply coated with liquid, fast-wicking cellulose-based kaolin granules begin to soak up liquid the moment they touch the spill
- 100% recycled content is a byproduct of the paper-making process, ideal when green products are desired or required
- Silica-free composition does not pose the health hazards associated with breathing in clay dust
- Light-weight absorbent is easier than clay to carry and use without injury
- Can be incinerated after use to reduce waste or for fuels blending

**Warnings & Restrictions** : Hydrofluoric Acid Notice  
Not for use with hydrofluoric acid.

**Recycled Content** : 100% Post-Consumer Recycled Cellulose Waste
