## Description

- Permanently solidifies to "lock" in absorbed liquids; liquids won't leak back out or revert to a liquid state when handled or placed under pressure
- Environmentally friendly product absorbs biological fluids including urine, blood and vomit; contains chlorine to kill pathogens, and to reduce odours
- Forms a solid mass without expanding for easier, less expensive recovery and cleanup; highly absorbent polymers leave the surface perfectly clean
- Non-toxic product is safe to handle and use
- Non abrasive product will not damage floors
